

SCALE FOR PROJECT DAY 06 (/PROJECTS/BOOTCAMP-DAY-06)

Guidelines

Before inspecting and grading each exercise, make sure to read and apply preliminaries.

Preliminaries

If cheating is suspected, the evaluation stops here. Tick the "Cheat" correction box at the top of this Scale page. You then have to let us know about it by opening a ticket on meta.intra.42.fr. In this ticket, you should indicate the Bootcamp day as well as the cheating student's login. => FYI : cheating means the student who is suspected cannot explain or recreate their own code, or he's used elements specifically forbidden in the subject or that go against school policies. Please do this calmly, wisely and with caution.

Simple preliminaries

- Defense can only happen if the student being evaluated is present. This way everybody progresses : by exchanging ideas and sharing knowledge with each other.
- Nothing submitted (or wrong file or directory) : 0, evaluation is over.
- As soon as you come accross an exercise that isn't fully fonctional, evaluation stops. The following exercises won't be evaluated.
- This defense session should last about 10 minutes. You've got other things to do, and 10 minutes should be more than enough to test whether each exercise works as it should.
- In order to grade your peer, you have to clone their git repository on their station.

✓ Yes

✗ No

Exercises

Check the Norm for each exercise before running tests. A Norm error means the student isn't rigorous enough. And like any error, it means 0. Norminator prevails when it comes to files or headers evaluation in C and only in C (that excludes makefile and shell script).

Exercise 00

You must perform your own series of checks, verifications and tests, in order to be able to assess whether the submitted exercise corresponds to what's been asked in the subject.

You should also check the Norme.

If you don't find a case where the program fails, tick Yes.

Otherwise, tick No and the Evaluation is over.

☒ Yes

☐ No

Exercise 01

You must perform your own series of checks, verifications and tests, in order to be able to assess whether the submitted exercise corresponds to what's been asked in the subject.

You should also check the Norme.

If you don't find a case where the program fails, tick Yes.

Otherwise, tick No and the Evaluation is over.

☒ Yes

☐ No

Exercise 02

You must perform your own series of checks, verifications and tests, in order to be able to assess whether the submitted exercise corresponds to what's been asked in the subject.

You should also check the Norme.

If you don't find a case where the program fails, tick Yes.

Otherwise, tick No and the Evaluation is over.

☒ Yes

☐ No

Exercise 03

You must perform your own series of checks, verifications and tests, in order to be able to assess whether the submitted exercise corresponds to what's been asked in the subject.

You should also check the Norme.

If you don't find a case where the program fails, tick Yes.

Otherwise, tick No and the Evaluation is over.

☒ Yes

☐ No

Exercise 04

You must perform your own series of checks, verifications and tests, in order to be able to assess whether the submitted exercise corresponds to what's been asked in the subject.

You should also check the Norme.

If you don't find a case where the program fails, tick Yes.

Otherwise, tick No and the Evaluation is over.

☒ Yes

☐ No

Ratings

Don't forget to check the flag corresponding to the defense
