

SCALE FOR PROJECT DAY 01 (/PROJECTS/BOOTCAMP-DAY-01)

Guidelines

Preliminaries have to be known and applied before verifying the exercises.

Read and watch again the documentation regarding the peer evaluation, talk to your friends and use the forum. This tool is also part of your education at WeThinkCode_.

📎 Subject (<https://cdn.intra.42.fr/pdf/pdf/675/d01.en.pdf>)

Preliminaries

If cheating is suspected, the evaluation stops here. Tick the "Cheat" correction box at the top of this Grading page. You then have to let us know about it by opening a ticket on meta.intra.42.fr. In this ticket, you should indicate the Bootcamp day as well as the cheating student's login. => FYI cheating means the student who is suspected cannot explain or recreate their own code, or he's used elements specifically forbidden in the subject or that go against school policies. Please do this calmly, wisely and with caution.

Simple preliminaries

- The p2p can only happen if the student being evaluated is present. This way everybody progresses : by exchanging ideas and sharing knowledge with each other.
- If nothing has been submitted (or a wrong file or directory) : 0, evaluation is over.
- As soon as you come across an exercise that isn't fully functional, evaluation stops. The following exercises won't be evaluated but can be discussed.
- This p2p session should last about 10 minutes. You've got other things to do, and 10 minutes should be more than enough to test whether each exercise works as it should.
- In order to grade your peer, you have to clone their git repository on their computer.

✓ Yes

✗ No

Exercises

Exercise 00

Did the student register for both the exam projects and the event? Does the Exam file contains both information? If both are validated tick Yes.

Otherwise, tick No and check the next exercise.

☒ Yes

☐ No

Exercise 01

Check the git log and assess that the last exercise was pushed separately at least once.

If you find a commit that shows it, tick Yes.

Otherwise, tick No and check the next exercise.

☒ Yes

☐ No

Exercise 02

Run the script of the student by typing

```
sh who_am_i.sh
```

Does the display look like the subject with an uid and a cn.

If it does, tick Yes.

Otherwise, tick No and check the next exercise.

☒ Yes

☐ No

Exercise 03

Check the git log and assess that the last exercise was pushed separately at least once.

If you find a commit that shows it, tick Yes.

Otherwise, tick No and check the next exercise.

☒ Yes

☐ No

Exercise 04

Create the environment variable FT_USER with your user and run the script. Update the variable and put exam in it. Does the script work in both cases?

If it does, tick Yes.

Otherwise, tick No and check the next exercise.

☒ Yes

☐ No

Exercise 05

Check the git log and assess that the last exercise was pushed separately at least once.

If you find a commit that shows it, tick Yes.

Otherwise, tick No and check the next exercise.

☒ Yes

☐ No

Exercise 06

You must perform your own series of checks, verifications and tests, in order to be able to assess whether the submitted exercise corresponds to what's been asked in the instructions.

If you don't find a case where the program fails, tick Yes.

Otherwise, tick No and check the next exercise.

☒ Yes

☐ No

Exercise 07

Check the git log and assess that the last exercise was pushed separately at least once.

If you find a commit that shows it, tick Yes.

Otherwise, tick No and check the next exercise.

☒ Yes

☐ No

Exercise 08

You must perform your own series of checks, verifications and tests, in order to be able to assess whether the submitted exercise corresponds to what's been asked in the instructions.

If you don't find a case where the program fails, tick Yes.

Otherwise, tick No and check the next exercise.

☒ Yes

☐ No

Exercise 09

Check the git log and assess that the last exercise was pushed separately at least once.

If you find a commit that shows it, tick Yes.

Otherwise, tick No and check the next exercise.

☒ Yes

☐ No

Exercise 10

You must perform your own series of checks, verifications and tests, in order to be able to assess whether the submitted exercise corresponds to what's been asked in the instructions.

If you don't find a case where the program fails, tick Yes.

Otherwise, tick No and check the next exercise.

☒ Yes

☐ No

Exercise 11

Check the git log and assess that the last exercise was pushed separately at least once.

If you find a commit that shows it, tick Yes.

Otherwise, tick No and check the next exercise.

☒ Yes

☐ No

Exercise 12

You must perform your own series of checks, verifications and tests, in order to be able to assess whether the submitted exercise corresponds to what's been asked in the instructions.

If you don't find a case where the program fails, tick Yes.

Otherwise, tick No and check the next exercise.

☒ Yes

☐ No

Exercise 13

Check the git log and assess that the last exercise was pushed separately at least once.

If you find a commit that shows it, tick Yes.

Otherwise, tick No and check the next exercise.

☒ Yes

☐ No

Exercise 14

You must perform your own series of checks, verifications and tests, in order to be able to assess whether the submitted exercise corresponds to what's been asked in the instructions.

If you don't find a case where the program fails, tick Yes.

Otherwise, tick No and check the next exercise.

☒ Yes

☐ No

Exercise 15

Check the git log and assess that the last exercise was pushed separately at least once.

If you find a commit that shows it, tick Yes.

Otherwise, tick No and check the next exercise.

☒ Yes

☐ No

Exercise 16

You must perform your own series of checks, verifications and tests, in order to be able to assess whether the submitted exercise corresponds to what's been asked in the instructions.

If you don't find a case where the program fails, tick Yes.

Otherwise, tick No and check the next exercise.

☒ Yes

☐ No

Exercise 17

Check the git log and assess that the last exercise was pushed separately at least once.

If you find a commit that shows it, tick Yes.

Otherwise, tick No and check the next exercise.

☒ Yes

☐ No

Exercise 18

You must perform your own series of checks, verifications and tests, in order to be able to assess whether the submitted exercise corresponds to what's been asked in the instructions.

If you don't find a case where the program fails, tick Yes.

Otherwise, tick No and check the next exercise.

☒ Yes

☐ No

Exercise 19

Check the git log and assess that the last exercise was pushed separately at least once.

If you find a commit that shows it, tick Yes.

Otherwise, tick No and check the next exercise.

☒ Yes

☐ No
