

SCALE FOR PROJECT PISCINE SWIFT IOS (/PROJECTS/PISCINE-SWIFT-IOS) / DAY 04 (/PROJECTS/PISCINE-SWIFT-IOS-DAY-04)

Introduction

For the smooth running of this evaluation we ask you to respect the following :

- Stay courteous, polite, respectful and constructive in all situations during this exchange. The relationship of trust between community 42 is something you depend on.
- Highlight to the person(or group) find eventual dysfunction of getting the work done, and take time to discuss and debate them.
- Accept that there may be differences in interpreting the subject's requests or the scope of the features. Stay open-minded to the vision of the others (is he right or wrong?), and evaluate the most honestly possible. The pedagogy of 42 make sense only if the peer-evaluation is done seriously.

Guidelines

- You should only evaluate what is on the GiT repository of the student or the group.
- Make sure to check that the GiT repository is the one corresponding to the student or group and the project.
- Meticulously check that no malicious things have been used to mislead you and make you evaluate something other than the official content.

- Any script intended to facilitate the evaluation provided by one of the two parties must be rigorously verified by the other party to avoid some unpleasant surprises.

- If the student/ corrector has not yet done this project, it is mandatory for the student/corrector to read the subject in full before beginning this defense.

- Use the available flags to sign something rendered empty, non-functional, a case of cheating, etc. In this case, the assessment is completed and the final mark is 0 (or -42 in the special case of cheating). However, except in the case of cheating, you are encouraged to continue to discuss the work that has been done (or not done) to identify the problems that have led to this situation and avoid them for the next rendering.

 Subject (<https://cdn.intra.42.fr/pdf/pdf/5439/d04.en.pdf>)

Exercise 00

Tweet

- Does the struct "Tweet" exist with 2 parameters, "let name : String" and "let text : String?"
- Is it implemented in CustomStringConvertible protocol?

 Yes

 No

Exercise 01

APITwitterDelegate

- Is the "APITwitterDelegate" presented with the 2 requested methods ?

 Yes

 No

Exercise 02

Requests

- Does the queries work ?
- Are the last 100 french tweets present in the debug console?
- The methods of the delegate are called even if for the moment the property delegate is to 'nil' ?

☒ Yes

☐ No

Exercise 03

Table View

- Are the 100 tweets displayed in the Table View ?
- Does the ViewController from the Table View implement the APITwitterDelegate protocol ?

☒ Yes

☐ No

Exercise 04

Research

- Is there a search field ?
- Can you make a search on twitter and the tweets to appear in the table view ?
- When you press "enter" key, does the keyboard disappear?

☒ Yes

☐ No

Exercise 05

Finishes

- Do we have Custom Cell with a size that varies according to its content ?
- Is there an alert displayed when the connection is lost ?
- Can we see the date of the tweets in the Table View ?

☒ Yes

☐ No

Ratings

Don't forget to check the flag corresponding to the defense

★ Outstanding project

■ Empty work

■ Incomplete work

■ Cheat

■ Crash

⊘ Forbidden function

Conclusion
