# SCALE FOR PROJECT GOMOKU (/PROJECTS/GOMOKU)

#### Introduction

In order to have a productive and tolerable grading session, we ask that you:

- Stay courteous, polite, respectful and constructive during this session. The bond of trust between members of the 42 community
- Take care to show the graded person(s) the problems you notice, and explain them as best you can;
- Accept that there may be differences in interepretation on the featureset and/or what the subject requires. Stay open-minded, try to honestly determine who is right and who is not, and grade accordingly.

## **Guidelines**

Remember that you must ONLY grade what's on the turn-in repository!

You have to "git clone" the repository, and grade what's on it, AND ONLY WHAT IS ON IT.

### **Attachments**

Subject (https://cdn.intra.42.fr/pdf/pdf/2033/gomoku.pdf)

### First and foremost

#### Preliminary checks

Check the following elements:

- There is something in the git repository
- The "auteur" file, if required by the subject, is present and valid
- The Makefile, if required, is present and has the required rules

If one of these elements is not in confirmity with what the subject requires, the session stops. You may still debate on the project, but you are not to grade the student(s).

2 levels -> 1 3 to 5 levels -> 2 5 to 10 levels -> 4 10 or more levels -> 5  Rate it from 0 (failed) through 5 (excellent)  Search space Evaluate the search space of the algorithm  Entire board -> 0  Rectangular window around all placed stones -> 3  Multiple rectangular windows emcompassing placed stones but minimizing wasted space -> 5	- Only 1 level -> 0	
Search space Evaluate the search space of the algorithm  Entire board -> 0  Rectangular window around all placed stones -> 3  Multiple rectangular windows emcompassing placed stones but minimizing wasted space -> 5	- 2 levels -> 1	
Rate it from 0 (failed) through 5 (excellent)  Search space Evaluate the search space of the algorithm  Entire board -> 0  Rectangular window around all placed stones -> 3  Multiple rectangular windows emcompassing placed stones but minimizing wasted space -> 5	- 3 to 5 levels -> 2	
Rate it from 0 (failed) through 5 (excellent)  Search space Evaluate the search space of the algorithm  Entire board -> 0  Rectangular window around all placed stones -> 3  Multiple rectangular windows emcompassing placed stones but minimizing wasted space -> 5	- 5 to 10 levels -> 4	
Search space Evaluate the search space of the algorithm  Entire board -> 0  Rectangular window around all placed stones -> 3  Multiple rectangular windows emcompassing placed stones but minimizing wasted space -> 5	- 10 or more levels -> 5	
Search space Evaluate the search space of the algorithm  Entire board -> 0  Rectangular window around all placed stones -> 3  Multiple rectangular windows emcompassing placed stones but minimizing wasted space -> 5		
Evaluate the search space of the algorithm  Entire board -> 0  Rectangular window around all placed stones -> 3  Multiple rectangular windows emcompassing placed stones but minimizing wasted space -> 5		Rate it from 0 (failed) through 5 (excellent)
Evaluate the search space of the algorithm  Entire board -> 0  Rectangular window around all placed stones -> 3  Multiple rectangular windows emcompassing placed stones but minimizing wasted space -> 5		
Evaluate the search space of the algorithm  Entire board -> 0  Rectangular window around all placed stones -> 3  Multiple rectangular windows emcompassing placed stones but minimizing wasted space -> 5		
Evaluate the search space of the algorithm  Entire board -> 0  Rectangular window around all placed stones -> 3  Multiple rectangular windows emcompassing placed stones but minimizing wasted space -> 5		
Entire board -> 0 Rectangular window around all placed stones -> 3 Multiple rectangular windows emcompassing placed stones but minimizing wasted space -> 5	Search space	
Rectangular window around all placed stones -> 3 Multiple rectangular windows emcompassing placed stones but minimizing wasted space -> 5	Evaluate the search space of t	the algorithm
Rectangular window around all placed stones -> 3 Multiple rectangular windows emcompassing placed stones but minimizing wasted space -> 5	- Entire board -> 0	
Multiple rectangular windows emcompassing placed stones but minimizing wasted space -> 5		I all placed stones -> 3
Rate it from 0 (failed) through 5 (excellent)		
Rate it from 0 (failed) through 5 (excellent)		
		Rate it from 0 (failed) through 5 (excellent)

# Heuristic

In this section, the students must be able to THOROUGHLY explain their heuristic function. If they can not explain it well, then they do not understand it well enough, so do not grade this section. REPEAT: IF THE STUDENTS CAN NOT EXPLAIN THEIR HEURISTIC IN DETAIL, THEIR IMPLEMENTATION IS WORTH EXACTLY NOTHING, SO DO NOT GRADE THIS SECTION.

Static part - Alignme	ents	
Does the heuristic take o	current alignments into account ?	
		×No
	9 .00	<i>/</i> (,
Static part - Potentia	ıl win by alignment	
Does the heuristic check	c whether an alignment has enou	gh space to develop into a 5-in-a-row ?
	⊗ Yes	×No
	O les	/ \\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\
Static part - Freedon	n	
Does the heuristic weigh	h an alignment according to its fr	eedom (Free, half-free, flanked) ?
		×No
	⊗ fes	/\ N0
Static part - Potentia	ıl captures	
Does the heuristic take p	potential captures into account ?	
		×N₀
	⊗ Yes	∕ No
Static part - Capture	s	
	current captured stones into acco	unt ?
	-/	
	✓ Yes	×N₀
Static part - Figures		
	c for advanteageous combination	ns ?
	-	
	✓ Yes	×No
