SCALE FOR PROJECT PISCINE SWIFT IOS (/PROJECTS/PISCINE-SWIFT-IOS) / RUSH01 (/PROJECTS/PISCINE-SWIFT-IOS-RUSH01)

Introduction

For the smooth runnning of this evaluation we ask you to respect the following :

- Stay courteous, polite, respectful and constructive in all situations during this exchange. The relationship of trust between community 42 is something you depend on.

- Highlight to the person(or group) find eventual dysfunction of getting the work done, and take time to discuss and debate them.

- Accept that there may be differences in interpreting the subject's requests or the scope of the features. Stay open-minded to the vision of the others (is he right or wrong?), and evaluate the most honestly possible. The pedagogy of 42 make sense only if the peer-evaluation is done seriously.

Guidelines

- You should only evaluate what is on the GiT repository of the student or the group.

- Make sure to check that the GiT repository is the one corresponding to the student or group and the project.

- Meticulously check that no malicious things have been used to mislead you and make you evaluate something other than the official content.

- Any script intended to facilitate the evaluation provided by one of the two
parties must be rigorously verified by the other party to avoid some
unpleasant surprises.

- If the student/ corrector has not yet done this
project, it is mandatory for the student/corrector to read the
subject in full before beginning this defense.

- Use the available flags to sign something
rendered empty, non-functional, a case of cheating,
etc. In this case, the assessment is completed and the final mark is
0 (or -42 in the special case of cheating). However, except in the case of cheating,
you are encouraged to continue to discuss the work that has been done (or not done)
to identify the problems that have led to this situation and avoid them for the next
rendering.
