Preliminaries

If cheating is suspected, the evaluation stops here. Tick the "Cheat" correction box at the top of this Scale page. You then have to let us know about it by opening a ticket on meta.intrav2.42.fr. In this ticket, you should indicate the Bootcamp day as well as the cheating student's login. => FYI : cheating means the student who is suspected cannot explain of recreate their own code, or he's used elements specifically forbidden in the subject or that go against school policies. Please do this calmy, wisely and with caution.

Simple preliminaries

- Nothing submitted (or wrong file or directory) : 0, evaluation is over.
- As soon as you come accross an exercise that isn't fully fonctional, evaluation stops. The following exercises won't be evaluated.
☑ Yes   ✕ No

Features

Check the Norm for each exercise before running tests. A Norm error means the student isn't rigorous enough. And like any error, it means 0. Norminator prevails when it comes to files or headers evaluation in C and only in C (that excludes makefile and shell script).

Features testing

Does the program work the way it should ? Was the subject rigorously respected ?

☑ Yes   ✕ No

Explanation

Ask the shyest team member to explain how the code works.

If his/her explanations are satisfying, but the program doesn't pass the tests, tick No.

If his/her explanations are satisfying, and the program passes all tests, tick Yes.

☑ Yes   ✕ No

Bonus

Bonuses

This part can be filled ONLY for those who've collected all points for features and explanations. At the examiner's own discretion.

Exemple de bonus :
- fulfilment of an extra subject => 1 grade (so up to 4 max)
- handling of Argc / Argv => 1 grade
- ...

Rate it from 0 (failed) through 5 (excellent)
