SCALE FOR PROJECT PISCINE PHP (/PROJECTS/PISCINE-PHP) / DAY 00 (/PROJECTS/42-PISCINE-C-FORMATION-PISCINE-PHP-DAY-00)

Guidelines

You know a little about how peer2peer correction by now, it works as usual. If you forget the spirit of the peer2perr correction, look up the dedicated video on e-learning.

Preliminaries

The basics

- Is everybody present?
- Only grade the work that is in the student or group's GiT repository.
- Chrome as well as curl must be used for this defence (the version available on the dumps). If there is nothing in the repository put 0 and stop evaluation. Discuss what went wrong (not necesseraly on the technical side) and how to avoid same situalion tomorrow.

⊘ Yes   ✕ No

Exo00 - B.A.BA or home

Let's test ex00

Are all the required elements here ?

- Is the background in pink color ? FFC0CB (or in decimal your choice) - Is the tab title ok? "B.A.BA"
- A title is present, in white, visibly writer with a bigger police, centered on the page, which contains an accent at least.
- Two images side by side which represent e-shops
- A link under each images. The link must not touch the image. When you click on a link, it redirects to the corresponding web shop.
- The horizontal line
- The copyright in the bottom right in italic with a login and a year, all in monospace Answer no if one of these elements is missing. You can accept one point not correctly done over the 7, but only one. Overwise, it's NO, the correction of the day00 stop here.

⊘ Yes   ✕ No

Ex01 Mendeleiev

Will Dimitri be happy ?

The Array

Is the array corresponding to what's expected?

- the array (with and without the lanthanides: at least 7x18, the additional 2 lines for pleasure) is correctly displayed
- it's not an image of an array, only html/css : modify one of the element in the source, check that it's change also on the browser
- There is also some colors and one image (at least) for the deco!
- Each cell of the array contains the symbol in bigger letters, the number and the atomic weight, respectively in the bottom left and in the upper right. If it's not beautiful but technically corresponds at what is asked for, then it's ok.
If it doesn't correspond to what's asked for : the evaluation of the day stop here.

⊘ Yes   ✕ No

Ex02 Day of the 42

How complete is your game interface ?

Point to checks

There is many points to checkout for this exercice:

- the exact use of the given images (not less, not more)
- at least 10 alt/title asked (the 2 icons at the top, the 5 actions, the 3 objects). If there is more, ok (by example: the area on the central image)
- the 2 dynamic areas of the central image
- the 3 links are functionnal
- the choice of grey compared to the grey of the title image
- the magnifying glass which is overflowing a little
- the green text area which cover the central image
- The size and the family for the font of each piece of the text (size: it must cut the sentence at the same place without 'br') (family: sherif/sans/fixed)
- the red shadow under a text area. A tolerance of 3 can be applied over the 13 points. If there is more than 3 issues, then it's not correct and the evaluation of the day00 stop here.

� Yes   ✕ No

Ex03 The shrunk agent

Responsive design

control of the responsivity

Display the page. enlarge and then decrease the size of the window. The size of the array of Mendeleiev and his font must differ at least in the 2 directions. If it's smooth, it's worth a bonus (see the next question). If it's a little rusty (for example some texts are drooling on the next box, or there is only 2 different sizes), **grr hmpf** it's still OK. If the size of the boxes change only once and not the font, or the oposite, or no change at all: it's not ok, the correction must stop here.

⊘ Yes	✕ No

Bonus

It's very smooth isn't it?

⊘ Yes	✕ No

Ex04 SNCF* Sandwich

It's the drop down list...

Do we have a menu?

The concept of the menu, it's in the When you click on any element visible by default, we have a new drop down list wich emerge with one or more items. Not Ok if only one element at the root wich open a new list with only one element. It doesn't look like a drop down list. You need to have many lists and preferably with a lot of lists inside lists. If there is not a menu, or there is other things than HTML or CSS, you answer NO and the correction stops here.

⊘ Yes	✕ No

Ex05 SCUMM

Script Creation Utility for Maniac Mansion That's for those of you who didn't search on wikipedia.

A playable game ?

To consider this game as playable, it must have some kind of a scenario, with several places, objects to take, interactions with the environnement and people. We start somewhere, we have an objective and we can do it.

- the game is relatively playable, with some kind of scenario where the actions are not all available: it's ok.
- All the remaining part is bonus.

☑ Yes   ✕ No

Bonus

The game is crazy ! A super gameplay, cool images, lot of funny
objects and interactions with the characters...

☑ Yes   ✕ No

Ratings

Don't forget to check the flag corresponding to the defense

✔ Ok

📄 Empty work   🗐 Cheat   🏆 Crash   🚫 Forbidden function

Conclusion
